

CURVE MINERALFLEX HD

Inner Tube: natural rubber tube that is highly abrasion and tear resistant.

Reinforcement: high tensile textile braid with steel helix wire

80°C MÁX.

Cover: smooth (wrapped), made from black rubber that is abrasion, weather, ozone, saltwater and ultraviolet ray resistant.

APPLICATION

Curve used in mines and ore processing plants due to its high abrasion resistance and low friction coefficient. It replaces metallic curves with added advantages, since it has a prolonged useful life and reduces the localized cargo loss, further serving as an anti-vibration connection. Available only with full-face end fittings.
