

TANK TRUCK

**80°C
MAX.**

Inner Tube: black synthetic rubber tube resistant to oil derivatives, biodiesel and alcohol.

Reinforcement: high tensile textile braid with spiral wire and static conductive filament.

Cover: corrugated (wrapped finish) made from blue rubber that is resistant to abrasion, weather and oil derivatives in general.

Smooth cover option (wrapped) and with a blue continuous transfer label..

APPLICATION

Recommended for the light-duty suction and discharge of gasoline, biodiesel, oils and alcohol at reservoirs, and for train car and tank truck discharges. Extremely flexible product.
